FOOD CONTACT PACKAGING

Flexipol Packaging can confirm that all films purchased are produced from raw materials which are approved for food contact under EEC Directive 2002/17/EC.

The polymer composition of the base polymers in the product complies with the positive lists for monomers in the EEC Commission Directive of 23rd February 1990 relating to Plastic Materials and Articles intended to come into contact with food stuffs.

Monomers used are listed in Section A of the monomer list.

Flexipol Packaging recognises its responsibility as a converter of resin and therefore results of migration tests carried out on our behalf are available upon request.
